

## VaderVideo Shotlist –Weather and Sky– Clouds - Vol 2

	Filename <sup>1</sup>	Short	Size	Fps	Length <sup>2</sup>
1	movinin-tl-med	Moving in and closing	720x480 (N)	29.97	00:00:15
2	movinin-tl-slow	Moving in and closing	720x480 (N)	29.97	00:00:16
3	mtnheavyclds-tl-med	Heavy over mountains	720x480 (N)	29.97	00:00:14
4	mtnheavyclds-tl-slow	Heavy over mountains	720x480 (N)	29.97	00:00:10
5	mtnpuffer-tl-fast	Puffing desert mountain-saguaro	720x480 (N)	29.97	00:00:14
6	mtnpuffer-tl-slow	Puffing desert mountain-saguaro	720x480 (N)	29.97	00:00:10
7	mtnpuffer-tl-vfast	Puffing desert mountain-saguaro	720x480 (N)	29.97	00:00:07
8	openuptostreaks-tl-medslow	Opening with light streaks	720x480 (N)	29.97	00:00:06
9	puffingmountainhorizon-tl-hisped	Over the mountain peaks	720x480 (N)	29.97	00:00:07
10	scattergray-tl-med	Gray scatter off the mountain	720x480 (N)	29.97	00:00:18
11	shimmeroflight-tl-fast	Shimmer of light	720x480 (N)	29.97	00:00:12
12	shimmeroflight-tl-slow	Shimmer of light	720x480 (N)	29.97	00:00:10
13	spyglass-tl-fast	Thru a spyglass	720x480 (N)	29.97	00:00:10
14	spyglass-tl-slow	Thru a spyglass	720x480 (N)	29.97	00:00:10
15	stormsbuilding-tl-med	Storm buildup	720x480 (N)	29.97	00:00:12
<b>LONG BONUS CLIPS</b>					
16	movingby-tl-medslow	Gray pack passing by	720x480 (N)	29.97	00:00:20
17	movinin-tl-medslow	Moving in and closing	720x480 (N)	29.97	00:00:31
18	mtnheavyclds-tl-medslow	Heavy over mountains	720x480 (N)	29.97	00:00:28
19	mtnpuffer-tl-med	Puffing desert mountain-saguaro	720x480 (N)	29.97	00:00:29
20	puffingmountainhorizon-tl-med	Over the mountain peaks	720x480 (N)	29.97	00:00:30
21	puffingmountainhorizon-tl-slow	Over the mountain peaks	720x480 (N)	29.97	00:00:30
22	scattergray-tl-medslow	Gray scatter off the mountain	720x480 (N)	29.97	00:00:36
23	shimmeroflight-tl-med	Shimmer of light	720x480 (N)	29.97	00:00:24

### Notes:

<sup>1</sup> All filenames end with .avi. If “-tl-“ is within the filename, it designates a time-lapse or stop footage sequence along with the visual speed. (slow, med, fast, vfast etc...) – if the filename ends with b, p, t it simply means you have 3 versions of the clip, bottom frame first, progressive, top frame first. Lightning happens so fast that in some cases anyone of these renderings may be better or best. (You decide.) We give them to you where the sequence needed it.

<sup>2</sup> The play length is to the nearest second. Some clips may be a few frames longer or a few frames shorter. Of course in “lightning” terms, 1 second is a life time!

All clips on this disk are NTSC 720x480, designated as 720x480(N) and are at 29.97 frames per second.

All footage was recorded on a Sony 3CCD TRV-950 MiniDV camera. These files were rendered using Magix Edit Pro V12 and Sony Vegas Pro V8.

### Some ideas for using cloud footage:

Here are just a few ideas and some possibilities of what to do with such footage:

- Create loops for backgrounds (“green screen” (a.k.a. chroma-key) work or background work –
- Combine several clips for dramatic effect on your next indie. (Horror, drama, sci-fi, they all can use a grey cloud or two.)

## VaderVideo Shotlist –Weather and Sky– Clouds - Vol 2

- Create music video's using just such sequences. (see examples at: <http://www.youtube.com/vadervideo>)
- Use them in your multimedia presentations on the web, or in slide presentations for special impact.

To our knowledge, there has never been such a variety in a cloud collection of stock footage available to date (and at this price!). It is our intent to be able to offer the largest variety possible, for any task or requirement. We hope we succeeded and that you will without a doubt agree.

**We thank you for your support!**

**If you have a special request or need of footage, drop us a line at:**
